Likya

Likya, presented by Persan for 2017 under the Dokumacı brand, is a refined linen collection created for the ones who have deep love for the natural. Drawing its inspiration from the elegant simplicity of nature, Likya offers a variety of charming fabrics for stylish as well as serene interiors.

Kilim inspired ethnic design with an urban touch and the modern herringbone stand out in the collection along with other smart geometric designs. Influenced by animal skin patterns, a two-tone linen upholstery fabric with chenille also adds to the charm of the collection.

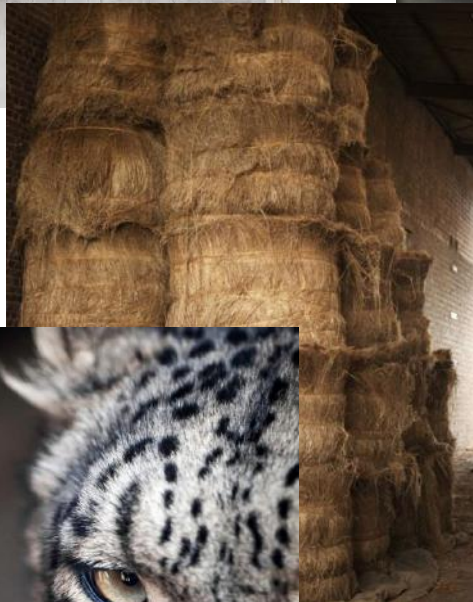

Likya offers a rich selection of coordinating plains and textures all in linen. This variety of plains feature light shimmering effects, coarse textures, chenille mixed plains, sharp calendered finishes and washed out appearances. Special finishes were used in order to obtain the soft and voluminous touch and to strengthen the natural linen feel. The colour palette of the collection is also in harmony with nature, presenting warm linen tones, soft flint greys, ivory and dark earth tones.

Calm and sophisticated, Likya collection fascinates all with its natural charm...
